Profile

Motivated Backend Web Developer with solid training in Laravel, PHP, and modern web technologies. Certified through a professional diploma at Eraasoft, with hands-on experience building real-world projects. Strong in creating scalable applications, clean code practices, and business process automation. Eager to grow and contribute to high-impact development teams.

Technical Skills

Backend: PHP 8+, Laravel, MySQL, RESTful APIs, MVC, SOLID Principles

Frontend: HTML, CSS, JavaScript, Bootstrap, jQuery, AJAX

Tools: Git, GitHub, Postman

Other: Problem-Solving, Debugging, Performance Optimization

Projects

Inventory System (Laravel)

Developed a full-stack inventory management system with dynamic stock tracking, real-time product movement logging, and integrated reporting features. Implemented secure data management functionalities including item registration, updates, deletion, and advanced search filters.

E-commerce Auto Parts Website

Built a responsive and scalable online store for car parts using Laravel, Bootstrap, and JavaScript. Implemented product catalog management, shopping cart logic, discount codes, and payment integration (Cash on Delivery, PayPal, Stripe).
